1.8 Explain why a small change in interest rate will have a larger effect on the price of a short-term security than a long-term security.

It is also in general considered that, by means of a telephone call, a person can be contacted in a more effective manner than by a letter. However, the use of a telephone call is not always possible, for example, if the person to be contacted is not at home or if the person to be contacted is not available for a telephone call. In such cases, a letter is often the only means of contact.
