1. In the first part of the article, the author discusses the importance of the study of the history of the development of the Russian language. The author emphasizes that the study of the history of the Russian language is not only a scientific task, but also a cultural one. The author notes that the study of the history of the Russian language helps to understand the development of the Russian nation and the role of the Russian language in the formation of the Russian state.

	2007	2008

— **CONCLUSÃO** — Os efeitos da exposição a germinantes de *Brassica napus* contaminados com o fungo *Aspergillus fumigatus* em ratos foram avaliados. Os resultados demonstraram que a ingestão de grãos contaminados com *A. fumigatus* ocasiona danos ao sistema respiratório, hepático e renal, além de causar alterações no sistema imunológico.

1. **What is the purpose of the study?** The purpose of the study is to investigate the effect of the intervention on the outcome.
2. **What is the research design?** The research design is a randomized controlled trial.
3. **What is the sample size?** The sample size is 100 participants.
4. **What is the intervention?** The intervention is the treatment being tested.
5. **What is the control?** The control is the comparison group.

Prima, rispetto al rapporto tra i principi di autonomia e di solidarietà, non si può dire che essi siano in tensione, in quanto la prima regola non esclude la seconda. Al contrario, la prima regola può essere interpretata come un invito a considerare la solidarietà come un principio guida per la politica economica.

En consecuencia, el estudio de la cultura organizacional puede ser un instrumento de gran utilidad para el desarrollo de la gestión empresarial, ya que permite comprender mejor el comportamiento de los miembros de la organización y, por lo tanto, mejorar la productividad y el rendimiento de la misma.
