~~NO THE REASON~~ ~~BEFORE~~ ~~ALL~~

10. *Chlorophyll a* and *Chlorophyll b* were determined using a spectrophotometer (Shimadzu UV-1601) at 663 nm and 646 nm, respectively. The concentrations were calculated using the following equations: $\text{Chlorophyll } a = 11.95 \times \text{OD}_{663} - 1.88 \times \text{OD}_{646}$ and $\text{Chlorophyll } b = 22.9 \times \text{OD}_{646} - 4.68 \times \text{OD}_{663}$ (Arar and Parsons 1995).
