

Figure 1. The effect of the concentration of the *Agrobacterium* suspension on the transformation efficiency of *Agrobacterium* strains. The number of transformed cells was determined by the number of colonies obtained after plating on the selective medium. The results are the mean of three independent experiments. Error bars represent standard deviation.

Figure 1. The effect of the number of trials on the mean accuracy of the responses. The error bars represent the standard error of the mean.

1. $\frac{1}{2} \times \frac{1}{2} = \frac{1}{4}$ (The probability of getting a head on the first coin and a head on the second coin is $\frac{1}{4}$.)
 2. $\frac{1}{2} \times \frac{1}{2} = \frac{1}{4}$ (The probability of getting a head on the first coin and a tail on the second coin is $\frac{1}{4}$.)
 3. $\frac{1}{2} \times \frac{1}{2} = \frac{1}{4}$ (The probability of getting a tail on the first coin and a head on the second coin is $\frac{1}{4}$.)
 4. $\frac{1}{2} \times \frac{1}{2} = \frac{1}{4}$ (The probability of getting a tail on the first coin and a tail on the second coin is $\frac{1}{4}$.)

[illegible][illegible]

the 1990s, the number of people in the world who are illiterate has increased from 1.2 billion to 1.5 billion. The number of illiterate people in the world is expected to reach 1.7 billion by the year 2015. The number of illiterate people in the world is expected to reach 1.7 billion by the year 2015.
