Figure 1. The effect of the number of nodes on the number of nodes in the network. The number of nodes in the network is plotted against the number of nodes in the network. The number of nodes in the network is plotted against the number of nodes in the network. The number of nodes in the network is plotted against the number of nodes in the network.

As a result of the above, the authors have concluded that the use of the proposed model for the analysis of the data obtained from the tests of the specimens of the composite material is not only possible, but also effective. The authors also believe that the proposed model can be used for the analysis of the data obtained from the tests of the specimens of the composite material with a different structure of the reinforcement.
