

## Setting (20, 2, 4, 10, 20)

1. **Introduction to the subject**  
The course is designed to provide a comprehensive overview of the subject matter. It covers the fundamental concepts and principles that underpin the field, as well as the latest research and developments. The course is suitable for students with a background in the subject, as well as those who are new to the field.
2. **Course objectives**  
The course aims to achieve the following objectives:
  - To provide a solid foundation in the subject matter.
  - To develop the students' critical thinking and problem-solving skills.
  - To enable the students to apply their knowledge to real-world situations.
3. **Course structure**  
The course is structured into four main modules, each covering a different aspect of the subject. The modules are designed to be progressive, building on the knowledge and skills acquired in the previous modules. The course is delivered through a combination of lectures, seminars, and practical exercises.
