

Albuquerque, NM, USA, April 2012

### A Testimony

The rewards for business efficiency for the City of Albuquerque are now apparent after just one year of planning by MEGAJUN's professional team.

An agency of the state government can face challenges, particularly regarding the implementation of complex and lengthy IT system migrations and the need to maintain legacy systems while moving forward with modernized software and personnel to traditional public sector methods.

With the help of the tested framework and strict timelines, recently completed 'All Services On Demand' Mergers EA and associated contracts for the Information Technology Division's migration.
