FROM: DR. R. F. SCHNEIDER

RE: NMR SPECTRA OF
POLYMER SOLUTIONS

Enclosed are the NMR spectra of
the polymer solutions mentioned
in the letter of January 10, 1964.

The spectra were obtained on
a Varian A-60 NMR spectrometer
using the following conditions:

Temperature: 30°C
Solvent: CDCl₃
Concentration: 10% w/v

The chemical shifts are given
in ppm from TMS in the following
table:

Peak	Chemical Shift (ppm)
1	7.2
2	6.8
3	6.4
4	5.8
5	5.2
6	4.8
7	4.2
8	3.8
9	3.2
10	2.8
11	2.2
12	1.8
13	1.2
14	0.8
15	0.2

Very truly yours,
R. F. SCHNEIDER
