

WUOL

Figure 1. The effect of the concentration of the inhibitor on the rate of polymerization of α -methylstyrene in the presence of SnCl_4 at 25°C . The concentration of α -methylstyrene was 1.0 mol/L, and the concentration of SnCl_4 was 0.01 mol/L. The concentration of the inhibitor was 0.001 mol/L (○), 0.002 mol/L (□), 0.005 mol/L (△), 0.01 mol/L (◇), 0.02 mol/L (×), 0.05 mol/L (●), 0.1 mol/L (○), 0.2 mol/L (◇), 0.5 mol/L (×), 1.0 mol/L (●).

Figure 1 shows a vertical sequence of 15 line drawings illustrating the development of a chick embryo. The drawings are arranged in a column, with the first drawing at the top and the last at the bottom. Each drawing is labeled with a number from 1 to 15. The sequence shows the progression from a single cell to a fully formed chick with a beak and legs.

[illegible][illegible]

the first two cases, the system is stable if α is small enough. In the third case, the system is stable if α is large enough.
