... and the fact that the $\mathcal{H}^1$ -norm of $\mathbf{u}_\varepsilon$ is bounded by $C\varepsilon$ (see (2.10)) implies that $\mathbf{u}_\varepsilon \rightarrow 0$ in $\mathcal{H}^1(\Omega)$ as $\varepsilon \rightarrow 0$. This implies that $\mathbf{u}_\varepsilon \rightarrow 0$ in $L^2(\Omega)$ as $\varepsilon \rightarrow 0$. This implies that $\mathbf{u}_\varepsilon \rightarrow 0$ in $L^2(\Omega)$ as $\varepsilon \rightarrow 0$.

DISCUSSION: The results of this study suggest that the use of a single, standardized, and validated instrument to assess the quality of life of patients with a variety of chronic diseases is feasible. The results also suggest that the use of a single, standardized, and validated instrument to assess the quality of life of patients with a variety of chronic diseases is feasible. The results also suggest that the use of a single, standardized, and validated instrument to assess the quality of life of patients with a variety of chronic diseases is feasible.
