Figure 1 is a line graph showing the percentage of total energy expenditure (TEE) for different activities over a 24-hour period. The x-axis represents time in hours (0 to 24). The y-axis represents the percentage of TEE (0 to 100). The graph shows a clear diurnal pattern with higher energy expenditure during the day (08:00-18:00) and lower expenditure at night (22:00-06:00). The activities are categorized into: Sleeping (0-100%), Resting (0-100%), Light activity (0-100%), Moderate activity (0-100%), and Vigorous activity (0-100%). The graph shows that sleeping accounts for approximately 30% of TEE, resting for approximately 20%, light activity for approximately 10%, moderate activity for approximately 10%, and vigorous activity for approximately 10%.
