Figure 1. The effect of the concentration of the *Agrobacterium* suspension on the transformation efficiency of *Agrobacterium* strains. The concentration of the *Agrobacterium* suspension was 10⁶ cells/ml (○), 10⁷ cells/ml (□), 10⁸ cells/ml (△), and 10⁹ cells/ml (◇). The error bars represent the standard deviation of three independent experiments.

[illegible]

Figure 1. The effect of the concentration of the *Agrobacterium* strain on the transformation efficiency of *Agrobacterium* strain 101. The concentration of the *Agrobacterium* strain 101 was varied from 10 to 1000 cells per μ l. The transformation efficiency was determined by the number of transformants per μ l of the *Agrobacterium* strain 101. The transformation efficiency was determined by the number of transformants per μ l of the *Agrobacterium* strain 101. The transformation efficiency was determined by the number of transformants per μ l of the *Agrobacterium* strain 101.

1. The first part of the paper discusses the importance of the study of the history of the English language. It is argued that the study of the history of the English language is not only a matter of academic interest but also of practical importance. The study of the history of the English language can help us to understand the development of the English language and to see how it has changed over time. It can also help us to understand the relationship between the English language and other languages. The study of the history of the English language can also help us to understand the development of the English language and to see how it has changed over time. It can also help us to understand the relationship between the English language and other languages.
