- Abstract:** The purpose of this study was to determine if there were differences in the prevalence of risk factors for coronary artery disease between men who had been exposed to asbestos and those who had not. A case-control study was conducted among men aged 40-69 years who had been exposed to asbestos at work or home. The results showed that the prevalence of risk factors for coronary artery disease was significantly higher in the exposed group than in the non-exposed group.

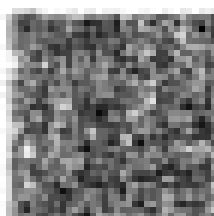

Los Angeles is an international city with a multicultural diversity in ethnicity, language, and religion. Los Angeles is a global city with a diverse population. The city is a melting pot of different cultures and languages. The city is a hub for international trade and commerce. The city is a center for international education and research. The city is a center for international culture and arts. The city is a center for international sports and entertainment. The city is a center for international business and industry. The city is a center for international government and politics. The city is a center for international science and technology. The city is a center for international health and medicine. The city is a center for international law and justice. The city is a center for international human rights and social justice. The city is a center for international environmental protection and sustainability. The city is a center for international peace and conflict resolution. The city is a center for international development and poverty reduction. The city is a center for international human development and well-being. The city is a center for international human rights and social justice. The city is a center for international environmental protection and sustainability. The city is a center for international peace and conflict resolution. The city is a center for international development and poverty reduction. The city is a center for international human development and well-being.
