conoscere e fare
 libro di 118 pagine
 ISBN 978-88-7000-252-2
 € 10,00
 Edizioni L'Espresso - 2012

Se non si è mai occupati di un progetto di ricerca, di un'attività di laboratorio o di un'attività di campo, questo libro è per voi. Vi insegnerà a progettare, a organizzare, a realizzare un'attività di ricerca o di laboratorio o di campo, a raccogliere i dati, a analizzarli, a interpretarli, a comunicare i risultati. Vi insegnerà a lavorare in gruppo, a comunicare, a risolvere i problemi, a prendere decisioni, a gestire i tempi, a organizzare le risorse, a valutare i risultati, a comunicare i risultati.

1. Progettare e organizzare un'attività di ricerca

1.1. Progettare un'attività di ricerca: obiettivi, ipotesi, metodi, strumenti, risorse, tempi, rischi, etica, comunicazione.

1.2. Organizzare un'attività di ricerca: struttura, ruoli, responsabilità, risorse, tempi, rischi, etica, comunicazione.

2. Raccolta dei dati

2.1. Raccolta dei dati: metodi, strumenti, risorse, tempi, rischi, etica, comunicazione.

2.2. Analisi dei dati: metodi, strumenti, risorse, tempi, rischi, etica, comunicazione.

3. Interpretazione e comunicazione dei risultati

3.1. Interpretazione dei risultati: metodi, strumenti, risorse, tempi, rischi, etica, comunicazione.

3.2. Comunicazione dei risultati: metodi, strumenti, risorse, tempi, rischi, etica, comunicazione.

QUESTIONING *Why is the study important? What is the research question? What is the purpose of the study? What is the research design? What is the sample? What is the data collection method? What is the data analysis method? What are the results? What are the conclusions? What are the implications? What are the limitations? What are the strengths? What are the weaknesses? What are the future research directions?*

1. Researcher's background and research experience

What is the researcher's background and research experience? What is the researcher's education? What is the researcher's research experience? What is the researcher's research interests? What is the researcher's research methods? What is the researcher's research results? What is the researcher's research conclusions? What is the researcher's research implications? What is the researcher's research limitations? What is the researcher's research strengths? What is the researcher's research weaknesses? What is the researcher's research future research directions?

2. Researcher's education and research experience

What is the researcher's education? What is the researcher's research experience? What is the researcher's research interests? What is the researcher's research methods? What is the researcher's research results? What is the researcher's research conclusions? What is the researcher's research implications? What is the researcher's research limitations? What is the researcher's research strengths? What is the researcher's research weaknesses? What is the researcher's research future research directions?

3. Researcher's research interests and research methods

What is the researcher's research interests? What is the researcher's research methods? What is the researcher's research results? What is the researcher's research conclusions? What is the researcher's research implications? What is the researcher's research limitations? What is the researcher's research strengths? What is the researcher's research weaknesses? What is the researcher's research future research directions?

4. Researcher's research results and research conclusions

What is the researcher's research results? What is the researcher's research conclusions? What is the researcher's research implications? What is the researcher's research limitations? What is the researcher's research strengths? What is the researcher's research weaknesses? What is the researcher's research future research directions?

5. Researcher's research implications and research limitations

What is the researcher's research implications? What is the researcher's research limitations? What is the researcher's research strengths? What is the researcher's research weaknesses? What is the researcher's research future research directions?

6. Researcher's research strengths and research weaknesses

What is the researcher's research strengths? What is the researcher's research weaknesses? What is the researcher's research future research directions?

7. Researcher's research future research directions

What is the researcher's research future research directions?
