Enclosed for the Forest Service are two copies of the report of the Forest Service on the subject of the Forest Service's policy on the use of fire in the management of the National Forest System. The report was prepared by the Forest Service's Fire Management Planning Committee and was submitted to the Forest Service's National Fire Management Conference in June 1974. The report contains a summary of the Forest Service's current policy on the use of fire in the management of the National Forest System and a proposed new policy on the use of fire in the management of the National Forest System. The proposed new policy is based on the Forest Service's current policy on the use of fire in the management of the National Forest System and is intended to provide a more consistent and effective approach to the management of the National Forest System.
