Le deuxième document (fig. 2) offre une vision globale de l'ensemble des émissions de CO₂ dans le secteur résidentiel et commercial en France. Il montre que les émissions dans ce secteur sont en forte croissance depuis 1990, mais qu'elles ont connu une stabilisation entre 2000 et 2005. Ces dernières années, les émissions dans ce secteur ont diminué de 10 %.

After a period of time, the students will determine if alternative fuel vehicles are more expensive than conventional vehicles.
