Figure 1 is a line graph showing the percentage of total energy expenditure (TEE) for different activities over a 24-hour period. The Y-axis is 'Percentage of TEE' (0-100) and the X-axis is 'Time of Day' (0-24). The activities and their approximate percentages are:

Time of Day	Sleeping	Resting	Sitting	Standing	Walking	Running
0	50	10	10	10	10	10

The figure consists of two side-by-side line graphs. Both graphs have 'Number of children' on the x-axis and 'Number of mothers' on the y-axis. The left graph shows a straight line starting from the origin and sloping upwards, representing a positive linear relationship. The right graph shows a curve that starts at the origin and curves upwards, becoming steeper as the number of children increases, representing a non-linear, concave relationship.
