PROBLEM 1

Consider the function $f(x) = x^2 + 1$.

(a) Find the derivative of $f(x)$ using the definition of the derivative.

(b) Find the derivative of $f(x)$ using the power rule.

(c) Find the derivative of $f(x)$ using the chain rule.

(d) Find the derivative of $f(x)$ using the product rule.

(e) Find the derivative of $f(x)$ using the quotient rule.

(f) Find the derivative of $f(x)$ using the implicit differentiation technique.

(g) Find the derivative of $f(x)$ using the substitution technique.

(h) Find the derivative of $f(x)$ using the logarithmic differentiation technique.

(i) Find the derivative of $f(x)$ using the L'Hôpital's rule.

(j) Find the derivative of $f(x)$ using the Taylor series expansion technique.

(k) Find the derivative of $f(x)$ using the Fourier series expansion technique.

(l) Find the derivative of $f(x)$ using the Laplace transform technique.

(m) Find the derivative of $f(x)$ using the Z-transform technique.

(n) Find the derivative of $f(x)$ using the discrete-time Fourier transform technique.

The study also aims to explore the impact of the region's health care system on the health and well-being of its population. The study also aims to explore the impact of the region's social services on the health and well-being of its population. The study also aims to explore the impact of the region's social inequality on the health and well-being of its population. The study also aims to explore the impact of the region's social services on the health and well-being of its population. The study also aims to explore the impact of the region's social inequality on the health and well-being of its population.

3.3. *Methodology and data collection*

The study uses a qualitative research methodology. The data is collected through interviews with key informants and focus group discussions. The data is also collected through a review of relevant literature and documents. The data is analyzed using a thematic analysis approach.

4. *Results*

The study finds that the region's economic and social conditions have a significant impact on the health and well-being of its population. The study also finds that the region's political and social conditions have a significant impact on the health and well-being of its population. The study also finds that the region's cultural and social conditions have a significant impact on the health and well-being of its population. The study also finds that the region's environmental conditions have a significant impact on the health and well-being of its population. The study also finds that the region's health care system has a significant impact on the health and well-being of its population. The study also finds that the region's social services have a significant impact on the health and well-being of its population. The study also finds that the region's social inequality has a significant impact on the health and well-being of its population. The study also finds that the region's social services have a significant impact on the health and well-being of its population. The study also finds that the region's social inequality has a significant impact on the health and well-being of its population.
