in response to the question, "What are the most important factors in determining the success of a business?"

MS-008 **Using Simps**

[illegible]

Figures 1 and 2 show the results of the regression analysis. The results show that the regression model is significant at the 0.05 level. The adjusted R-squared value is 0.12, indicating that the model explains 12% of the variance in the dependent variable. The results also show that the regression model is significant at the 0.05 level. The adjusted R-squared value is 0.12, indicating that the model explains 12% of the variance in the dependent variable.
