As condições de trabalho e de vida dos trabalhadores da indústria têxtil em Portugal são semelhantes às da Alemanha, mas que mostram a grande diferença de produtividade, uma vez que os alemães produzem 10 vezes mais por hora do que os portugueses. A produtividade alemã é de 100 unidades por hora, enquanto a portuguesa é de 10 unidades por hora. Isto demonstra que a produtividade alemã é 10 vezes superior à portuguesa.
