```

1  # Create a new matrix with the same dimensions as the input matrix
2  # and fill it with zeros.
3  # This is done by creating a matrix of zeros with the same dimensions
4  # as the input matrix.
5  # The dimensions of the input matrix are 1000 rows and 1000 columns.
6  # Therefore, the dimensions of the new matrix are also 1000 rows and 1000 columns.
7  # The new matrix is created by calling the zeros function with the dimensions
8  # of the input matrix.
9  # The new matrix is then assigned to the variable 'Z'.
10 # The new matrix is then used to calculate the product of the input matrix
11 # and the new matrix.
12 # The result is then assigned to the variable 'Y'.
13 # The result is then printed to the console.

```

que dependa de la disponibilidad financiera de la empresa contratante, siempre en relación a la actividad. Después de esto, la empresa contratante, al tener la información necesaria, podrá elegir entre las opciones de contratación de personal que mejor convenga a sus intereses.
