The image shows a document with a grid layout. At the top, the text "SERVICIO DE INMIGRACIONES" is visible. Below this, there is a large, stylized signature. To the right of the signature, the word "PASAPORTE" is partially visible. The document appears to be a passport or an official form, but the image is heavily degraded with noise and artifacts, making it difficult to read the details.

Figure 1. The effect of the concentration of the *Agrobacterium* suspension on the transformation efficiency of *Agrobacterium* strains. The *Agrobacterium* strains were grown in the medium containing 100 mg/l of tetracycline. The cell concentration of the *Agrobacterium* strains was adjusted to 10⁸ cells/ml. The cell suspension was mixed with the plant tissue and incubated for 24 h. The plant tissue was then cultured on the medium containing 100 mg/l of tetracycline. The transformation efficiency was determined by the number of transformants per 100 mg of plant tissue. The data are the mean ± SD of three independent experiments.

$\frac{d}{dt} \left(\frac{1}{\rho} \right) = - \frac{1}{\rho^2} \frac{d\rho}{dt}$
