Figure 1. The effect of the concentration of the *Agrobacterium* suspension on the transformation efficiency of *Agrobacterium* strains. The *Agrobacterium* strains were grown in YEA medium for 24 h at 28°C. The cell concentration of the strains was adjusted to 1.0 × 10⁸ cells/ml. The cell suspension was mixed with 100 µl of the plant cell suspension. The cell suspension was then mixed with 100 µl of the plant cell suspension. The cell suspension was then mixed with 100 µl of the plant cell suspension. The cell suspension was then mixed with 100 µl of the plant cell suspension.
