卷之三

卷之三

the following table. The first column lists the values of α and β for which the condition $\alpha > \beta$ is satisfied. The second column lists the corresponding values of $\alpha - \beta$. The third column lists the values of $\alpha + \beta$. The fourth column lists the values of $\alpha^2 - \beta^2$. The fifth column lists the values of $\alpha^2 + \beta^2$. The sixth column lists the values of $\alpha^3 - \beta^3$. The seventh column lists the values of $\alpha^3 + \beta^3$. The eighth column lists the values of $\alpha^4 - \beta^4$. The ninth column lists the values of $\alpha^4 + \beta^4$. The tenth column lists the values of $\alpha^5 - \beta^5$. The eleventh column lists the values of $\alpha^5 + \beta^5$. The twelfth column lists the values of $\alpha^6 - \beta^6$. The thirteenth column lists the values of $\alpha^6 + \beta^6$. The fourteenth column lists the values of $\alpha^7 - \beta^7$. The fifteenth column lists the values of $\alpha^7 + \beta^7$. The sixteenth column lists the values of $\alpha^8 - \beta^8$. The seventeenth column lists the values of $\alpha^8 + \beta^8$. The eighteenth column lists the values of $\alpha^9 - \beta^9$. The nineteenth column lists the values of $\alpha^9 + \beta^9$. The twentieth column lists the values of $\alpha^{10} - \beta^{10}$. The twenty-first column lists the values of $\alpha^{10} + \beta^{10}$.
