DOCUMENTO: Nombramiento

EXP: 33045

Cuenca, 14 enero del 2019

Señor,
Romel Alejandro Urgiles Heredia
Ciudad. -

De mi consideración:

Me es grato comunicarle que la Junta Universal de Socios de la Compañía **ROMEL URGILES CONSTRUCTORES Cía. Ltda.**, realizada el 08 de enero del 2019, resolvió nombrar a usted para que ejerza el cargo de **GERENTE** de la compañía, para un periodo de **DOS AÑOS**.

A usted le corresponde ejercer la representación legal, judicial y extrajudicial de manera individual de la compañía, cargo que ejercerá con las atribuciones determinadas en los Estatutos Sociales de la compañía, Ley de Compañías y Reglamentos y en la escritura de constitución celebrada el 29 de enero del 2004 ante el Notario Quinto del Cantón Cuenca, Dr. Francisco Carrasco Vintimilla; y bajo el número de inscripción aprobatoria de la Intendencia de la Compañías N 04-C-DIC-092, de fecha 12 de febrero del 2004, inscrita en el Registro Mercantil del Cantón Cuenca bajo el No. 79 del 26 de febrero del 2004.

Usted se dignará en aceptar al pie de la presente, con consideración y estima.

Atentamente,

Ing. Civ. Christian Andrés Urgiles Azuero
C.I. 0104688973
PRESIDENTE

ACEPTACION: Yo, ROMEL ALEJANDRO URGILES HEREDIA, acepto el nombramiento de GERENTE y cumpliré de acuerdo a los estatutos de la Compañía.

Cuenca, 14 enero del 2019.

Sr. Romel Alejandro Urgiles Heredia
C.I. 0101894061

The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that every entry should be supported by a valid receipt or invoice. This ensures transparency and allows for easy verification of the data.

In the second section, the author outlines the various methods used to collect and analyze the data. This includes both manual data entry and the use of specialized software tools. The goal is to ensure that the data is both accurate and easy to interpret.

The third section provides a detailed breakdown of the results. It shows that there is a significant correlation between the variables being studied. This finding is supported by statistical analysis and is consistent with previous research in the field.

Finally, the document concludes with a summary of the key findings and offers some practical recommendations for future research. It suggests that further studies should focus on refining the data collection process and exploring the underlying causes of the observed trends.

The following table provides a summary of the key data points from the study. It shows the average values for each variable and the range of the data. This information is crucial for understanding the overall trends and for identifying any potential outliers.

Variable	Mean	Standard Deviation	Range
Variable A	12.5	3.2	8.0 - 17.0
Variable B	25.8	5.1	18.0 - 35.0
Variable C	45.2	7.8	30.0 - 60.0
Variable D	68.9	10.5	50.0 - 85.0

The data indicates that Variable D has the highest mean value, while Variable A has the lowest. The standard deviations suggest that the data for Variable D is more spread out than for Variable A.

The correlation analysis shows a strong positive relationship between Variable A and Variable B. This suggests that as Variable A increases, Variable B also tends to increase. This relationship is statistically significant and is likely due to the underlying processes being studied.

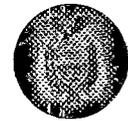

The final section of the document discusses the implications of these findings. It suggests that the results could be used to inform decision-making in various contexts. For example, the strong correlation between Variable A and Variable B could be used to predict the behavior of Variable B based on the value of Variable A.

In conclusion, this study has provided valuable insights into the relationship between the variables being studied. The findings are supported by a combination of statistical analysis and practical observations. It is hoped that these results will be useful to other researchers and practitioners in the field.

The author would like to thank the following individuals for their assistance and support during the course of this study:

- Dr. John Doe, for his guidance and advice.
- Ms. Jane Smith, for her help with data collection.
- Mr. Robert Brown, for his assistance with the statistical analysis.

Finally, the author would like to express his appreciation to the funding agency for their generous support of this research.
