stons Church-yard, 1682.

Question	Answer
1. What is the main purpose of the study?	To investigate the effect of the new curriculum on the learning outcomes of the students.
2. What are the research objectives?	To compare the learning outcomes of the students who were taught using the new curriculum with those who were taught using the old curriculum.
3. What is the research hypothesis?	The students who were taught using the new curriculum will have higher learning outcomes than those who were taught using the old curriculum.
4. What is the independent variable?	The curriculum (new vs. old).
5. What is the dependent variable?	The learning outcomes (test scores).
6. What is the research design?	Quasi-experimental design.
7. What are the limitations of the study?	The study was conducted in a single school, and the sample size was small.
8. What are the conclusions of the study?	The new curriculum had a positive effect on the learning outcomes of the students.
