Proposed Rule: The proposed rule would require that employees in groups that provide services to clients in the health professions be compensated based on their education, training, experience, skills, qualifications, and expertise. This proposal would also require that compensation for all healthcare workers be competitive relative to compensation offered by other healthcare organizations.

It is interesting that the $\text{Mg}^{2+}/\text{Mg}^{2+}$ ratio was higher than unity in all samples, suggesting that the samples were not saturated with respect to magnesium.

For example, because of the nature of the process, we have to determine which features of the system are relevant for the problem at hand and which are not.
