לְמִזְבֵּחַ תָּמִיד כְּלֵי קָרְבָּן וְלִבְנָה  
בְּבָנָה וְלִבְנָה

A scatter plot illustrating the relationship between the area (A) and the number of species (S). The x-axis, labeled "Area (A)", has major tick marks at 0, 1000, 2000, and 3000. The y-axis, labeled "Number of species (S)", has major tick marks at 0, 50, and 100. A series of approximately 50 data points is plotted as black dots, showing a strong positive correlation. A solid black line represents a linear regression fit to these points, starting near the origin and extending towards the top right corner of the plot.
