Health is essential for the well-being of the individual and the community. It is a state of complete physical, mental, and social well-being, and not merely the absence of disease or infirmity. Health is a dynamic process that changes over time and is influenced by various factors, including genetics, environment, and lifestyle. Maintaining good health requires a balanced diet, regular exercise, and adequate sleep. It also involves managing stress and seeking medical attention when needed. Health is the foundation for a happy and productive life.
