Problems: Reproductive success (RS) depends on both the number of successful matings and the quality of those matings. Problems include infidelity by males, infidelity by females, and competition for mates.

For example, the following sentence contains two errors: "The teacher asked the class to write a short story about their favorite book." The first error is the misspelling of "asked" as "asked". The second error is the lack of punctuation at the end of the sentence.

Prohibit, Implement, Monitor, Punish and Prevent (the 4 P's), from PATTI, Italy 2006, organized by University of Genoa, Italy.

The 2010-11 BSAI study found that 10% of children aged 6-11 years old had been exposed to lead at levels above the CDC's reference level of 5 micrograms per deciliter (µg/dL). The study also found that 10% of children aged 6-11 years old had been exposed to lead at levels above the CDC's reference level of 5 µg/dL.
