

Hacienda Santa Fe Páez Cda. Lda.

Nota explicativa a los estados financieros

1. Políticas contables significativas (Continuación)

2.1. Cuentas por cobrar - clientes y socios

Las cuentas y documentos a cobrar por se detallan en la Cuenta de Cuentas por cobrar y documentos a cobrar. La Compañía ha determinado que el cálculo del valor razonable de estas cuentas y documentos a cobrar es igual al valor nominal de las mismas.

Las cuentas por cobrar - clientes y socios se detallan en la Cuenta de Cuentas por cobrar y documentos a cobrar.

2.2. Inventario

Los inventarios corresponden a los productos que se utilizan en el proceso productivo para la producción de bienes de consumo. El valor de los inventarios se determina al costo de adquisición de los bienes.

2.3. Propiedad, mobiliario, maquinaria y equipos

La propiedad, mobiliario, maquinaria y equipos son registrados al costo menos la depreciación acumulada y cualquier pérdida acumulada por deterioro.

El costo de la propiedad, mobiliario, maquinaria y equipos comprende el precio de adquisición más los costos de transporte, instalación y otros costos necesarios para ponerlos en marcha en condiciones de funcionamiento.

Se evalúa el método de depreciación de los bienes significativamente en la depreciación, para determinar el valor razonable de los bienes.

Los gastos de reparación y mantenimiento se registran durante el periodo de depreciación de los bienes.

La depreciación de la Compañía es un procedimiento efectivo y preciso de acuerdo a la depreciación de los bienes.

Método de depreciación, valores útiles y valores residuales

La depreciación se calcula por el método de depreciación de los bienes.

Hacienda Santa Fe Páez Cda. Lda.

Nota explicativa a los estados financieros

2.4. Propiedad, mobiliario, maquinaria y equipos

Método de depreciación, valores útiles y valores residuales (Continuación)

Los valores	Útil
El valor de adquisición	10
El valor de depreciación	10
El valor de depreciación	10
El valor de depreciación	10

Resto a cargo de la propiedad, mobiliario, maquinaria y equipos

La depreciación se calcula por el método de depreciación de los bienes.

2.5. Activos biológicos

Los activos biológicos son los bienes biológicos que se utilizan en el proceso productivo.

La Compañía ha determinado que el valor razonable de los activos biológicos es el valor de adquisición.

No hay un método de depreciación de los activos biológicos.

Los activos biológicos son los bienes biológicos que se utilizan en el proceso productivo.

Método de depreciación

La depreciación se calcula por el método de depreciación de los bienes.

Hacienda Santa Fe Páez Cda. Lda.

Nota explicativa a los estados financieros

2.6. Activos biológicos (Continuación)

En procesos de producción

Corresponden a los bienes biológicos que se utilizan en el proceso productivo.

Impuesto a la renta

Impuesto a la renta

El impuesto a la renta se calcula por el método de depreciación de los bienes.

El impuesto a la renta se calcula por el método de depreciación de los bienes.

El impuesto a la renta se calcula por el método de depreciación de los bienes.

El impuesto a la renta se calcula por el método de depreciación de los bienes.

Impuesto a la renta

El impuesto a la renta se calcula por el método de depreciación de los bienes.

El impuesto a la renta se calcula por el método de depreciación de los bienes.

El impuesto a la renta se calcula por el método de depreciación de los bienes.

NOTES: 1. The first two columns are the same as in the first table. The third column is the number of cases of the disease in the community. The fourth column is the number of cases of the disease in the hospital. The fifth column is the number of cases of the disease in the nursing home. The sixth column is the number of cases of the disease in the clinic. The seventh column is the number of cases of the disease in the laboratory. The eighth column is the number of cases of the disease in the pharmacy. The ninth column is the number of cases of the disease in the dispensary. The tenth column is the number of cases of the disease in the outpatient department. The eleventh column is the number of cases of the disease in the inpatient department. The twelfth column is the number of cases of the disease in the emergency department. The thirteenth column is the number of cases of the disease in the intensive care unit. The fourteenth column is the number of cases of the disease in the operating room. The fifteenth column is the number of cases of the disease in the postoperative ward. The sixteenth column is the number of cases of the disease in the preoperative ward. The seventeenth column is the number of cases of the disease in the recovery room. The eighteenth column is the number of cases of the disease in the day surgery unit. The nineteenth column is the number of cases of the disease in the ambulatory surgery center. The twentieth column is the number of cases of the disease in the surgical suite. The twenty-first column is the number of cases of the disease in the operating room. The twenty-second column is the number of cases of the disease in the postoperative ward. The twenty-third column is the number of cases of the disease in the preoperative ward. The twenty-fourth column is the number of cases of the disease in the recovery room. The twenty-fifth column is the number of cases of the disease in the day surgery unit. The twenty-sixth column is the number of cases of the disease in the ambulatory surgery center. The twenty-seventh column is the number of cases of the disease in the surgical suite. The twenty-eighth column is the number of cases of the disease in the operating room. The twenty-ninth column is the number of cases of the disease in the postoperative ward. The thirtieth column is the number of cases of the disease in the preoperative ward. The thirty-first column is the number of cases of the disease in the recovery room. The thirty-second column is the number of cases of the disease in the day surgery unit. The thirty-third column is the number of cases of the disease in the ambulatory surgery center. The thirty-fourth column is the number of cases of the disease in the surgical suite. The thirty-fifth column is the number of cases of the disease in the operating room. The thirty-sixth column is the number of cases of the disease in the postoperative ward. The thirty-seventh column is the number of cases of the disease in the preoperative ward. The thirty-eighth column is the number of cases of the disease in the recovery room. The thirty-ninth column is the number of cases of the disease in the day surgery unit. The fortieth column is the number of cases of the disease in the ambulatory surgery center. The forty-first column is the number of cases of the disease in the surgical suite. The forty-second column is the number of cases of the disease in the operating room. The forty-third column is the number of cases of the disease in the postoperative ward. The forty-fourth column is the number of cases of the disease in the preoperative ward. The forty-fifth column is the number of cases of the disease in the recovery room. The forty-sixth column is the number of cases of the disease in the day surgery unit. The forty-seventh column is the number of cases of the disease in the ambulatory surgery center. The forty-eighth column is the number of cases of the disease in the surgical suite. The forty-ninth column is the number of cases of the disease in the operating room. The fiftieth column is the number of cases of the disease in the postoperative ward. The fifty-first column is the number of cases of the disease in the preoperative ward. The fifty-second column is the number of cases of the disease in the recovery room. The fifty-third column is the number of cases of the disease in the day surgery unit. The fifty-fourth column is the number of cases of the disease in the ambulatory surgery center. The fifty-fifth column is the number of cases of the disease in the surgical suite. The fifty-sixth column is the number of cases of the disease in the operating room. The fifty-seventh column is the number of cases of the disease in the postoperative ward. The fifty-eighth column is the number of cases of the disease in the preoperative ward. The fifty-ninth column is the number of cases of the disease in the recovery room. The sixtieth column is the number of cases of the disease in the day surgery unit. The sixty-first column is the number of cases of the disease in the ambulatory surgery center. The sixty-second column is the number of cases of the disease in the surgical suite. The sixty-third column is the number of cases of the disease in the operating room. The sixty-fourth column is the number of cases of the disease in the postoperative ward. The sixty-fifth column is the number of cases of the disease in the preoperative ward. The sixty-sixth column is the number of cases of the disease in the recovery room. The sixty-seventh column is the number of cases of the disease in the day surgery unit. The sixty-eighth column is the number of cases of the disease in the ambulatory surgery center. The sixty-ninth column is the number of cases of the disease in the surgical suite. The seventieth column is the number of cases of the disease in the operating room. The seventy-first column is the number of cases of the disease in the postoperative ward. The seventy-second column is the number of cases of the disease in the preoperative ward. The seventy-third column is the number of cases of the disease in the recovery room. The seventy-fourth column is the number of cases of the disease in the day surgery unit. The seventy-fifth column is the number of cases of the disease in the ambulatory surgery center. The seventy-sixth column is the number of cases of the disease in the surgical suite. The seventy-seventh column is the number of cases of the disease in the operating room. The seventy-eighth column is the number of cases of the disease in the postoperative ward. The seventy-ninth column is the number of cases of the disease in the preoperative ward. The eightieth column is the number of cases of the disease in the recovery room. The eighty-first column is the number of cases of the disease in the day surgery unit. The eighty-second column is the number of cases of the disease in the ambulatory surgery center. The eighty-third column is the number of cases of the disease in the surgical suite. The eighty-fourth column is the number of cases of the disease in the operating room. The eighty-fifth column is the number of cases of the disease in the postoperative ward. The eighty-sixth column is the number of cases of the disease in the preoperative ward. The eighty-seventh column is the number of cases of the disease in the recovery room. The eighty-eighth column is the number of cases of the disease in the day surgery unit. The eighty-ninth column is the number of cases of the disease in the ambulatory surgery center. The ninetieth column is the number of cases of the disease in the surgical suite. The hundredth column is the number of cases of the disease in the operating room.

④ Classification of the column

L'ensemble de ces données ont été analysés au 5^e de l'Université de Bielefeld, Allemagne.

1. *Introduction*

[illegible]

Abstract: The purpose of this study was to determine the effect of a 12-week training program on the physical fitness and health-related quality of life (HRQL) of sedentary, middle-aged women. The study was a randomized, controlled trial. The intervention group (n = 20) participated in a 12-week training program consisting of three sessions per week. The control group (n = 20) remained sedentary. The primary outcome was the change in HRQL, measured using the EuroQol-5D questionnaire. Secondary outcomes included changes in physical fitness, measured using the 6-minute walk test (6MWT) and the 10-meter walk test (10MWT). The results showed that the intervention group had a significant improvement in HRQL and physical fitness compared to the control group. The findings suggest that a 12-week training program can improve the physical fitness and HRQL of sedentary, middle-aged women.
