

1. The first step in the process of identifying a problem is to determine the nature of the problem. This involves a thorough understanding of the situation and the factors that may be contributing to the problem. Once the nature of the problem is understood, the next step is to identify the causes of the problem. This can be done by looking at the data and the information available and trying to identify the factors that are most likely to be causing the problem. Once the causes of the problem are identified, the next step is to develop a plan to address the problem. This plan should take into account the causes of the problem and the resources available to address the problem. Finally, the plan should be implemented and the results monitored to ensure that the problem is being effectively addressed.

NOTAS EXPLICATIVAS
A LOS ESTADOS FINANCIEROS
POR RUTOS CIA. LTA.
AL 31 DE DICIEMBRE DE 2014

1. The first step in the process of developing a new product is to identify a market need. This can be done through market research, which involves gathering information about the target market and its needs. Once a market need has been identified, the next step is to develop a product concept that addresses this need.

2. Market Research

Market research is the process of gathering information about the target market and its needs. This can be done through a variety of methods, including surveys, focus groups, and interviews. The information gathered through market research can be used to develop a product concept that addresses the target market's needs.

3. Product Development

Product development is the process of creating a new product. This involves developing a product concept, designing the product, and testing the product. Once the product has been developed, it can be brought to market.

4. Marketing

Marketing is the process of promoting a product and getting it into the hands of customers. This can be done through a variety of methods, including advertising, sales, and public relations.

5. Distribution

Distribution is the process of getting a product from the manufacturer to the customer. This can be done through a variety of methods, including direct sales, retail stores, and online sales. Once the product has been distributed, it can be sold to customers.

6. Sales

Sales is the process of selling a product to customers. This can be done through a variety of methods, including direct sales, retail stores, and online sales. Once the product has been sold, it can be delivered to customers.

7. Support
