1. The first step is to identify the problem. In this case, the problem is that the company is not meeting its sales targets.

WILSON, J. H. & J. H. WILSON

$\theta = 0$ and $\theta = \pi$ are the two extreme cases of the θ distribution. The $\theta = 0$ case corresponds to the case of a single θ distribution, and the $\theta = \pi$ case corresponds to the case of a double θ distribution. The $\theta = 0$ case is the most common case, and the $\theta = \pi$ case is the least common case. The $\theta = 0$ case is the most common case, and the $\theta = \pi$ case is the least common case.
